

PROJECT 2 :

Time Table Generation System

TEAM NAME : ERROR 40

TEAM MEMBERS : Siddhesh Kamath (2024004)

Nickhil Kadam (2024002)

Prathamesh Verlekar (2024005)

Anthony Dias (2024001)

Project Description :

Tools used : Microsoft Visual Studio , Microsoft Excel , Windows Forms with C#

The Time Table Generator is a c# windows form application which guides you about time table management System.

Even though most college administrative work has been computerized, the lecture timetable scheduling is still mostly done manually due to its inherent difficulties. The manual lecture-timetable scheduling demands considerable time and efforts.

The lecture-timetable scheduling is a problem for which we find a solution that satisfies the given set of constraints. college timetable is a temporal arrangement of a set of lectures in with the lecturer and time all given constraints are satisfied.

Creating such timetables manually is complex and time-consuming process. By using our system this process with computer assisted timetable generator can save a lot of precious time of administrators who are involved in creating and managing course timetables.
